

Save lives.

Be a brain tumour tissue donor.

By being a brain tumour tissue donor you will help save thousands of lives in the future.

If there's one thing that researchers need to find a cure for brain tumours, it's samples of brain tumour tissue. And today, there's not enough tissue with consent for researchers to do their work.

Brain tumour tissue is removed everyday by surgeons, but with so much focus on helping you back on your feet, your consent for the use of your brain tumour in future research isn't always sought.

Please, think about donating your tissue to research. Start the conversation. Ask your Consultant for the consent form today.

**“Please use
my brain tumour
for research”**

If you are expecting surgery, take this card to your next appointment to remind you to ask your consultant about donating brain tumour tissue for research.
